Egress Windows

Basements in dwelling units and every sleeping room below the fourth story shall have at least one operable window or exterior door approved for egress that opens directly onto a public street, public alley, yard, or court. The units shall be operable from the inside to provide a full clear opening without the use of separate tools or special knowledge.

All escape or rescue windows from sleeping rooms shall have a minimum net clear area of 5.7 square feet, grade floor openings shall have a minimum net clear area of 5 square feet. The minimum net clear open height dimension shall be 24 inches. The minimum net clear open width dimension shall be 20 inches. When windows are provided as a means of egress they shall have a finished sill height of not more than 44 inches above the floor.

Egress windows with a finished sill height below the adjacent ground elevation shall have a window well. Window wells for egress window shall comply with the following:

1. The clear horizontal dimensions shall allow the window to be fully opened and provide a minimum accessible net clear opening of 9 square feet, with a minimum dimension of 3 feet
2. Window wells with a vertical depth of more than 44 inches shall be equipped with an approved, permanently attached ladder or steps that is accessible with the window in the fully open position. The ladder or steps shall not encroach into the required dimensions of the window well by more than 6 inches.
